

TOUR CODE : MUSCJU-A

### Highlight

**[Seongsan Ilchulbong Peak]** rose from under the sea in a volcanic eruption over 100,000 years ago. There is a huge crater at the top of Seongsan Ilchulbong Peak. The crater is about 600m in diameter and 90m high. With the 99 sharp rocks surrounding the crater, it looks like a gigantic crown. While the southeast and north sides are cliffs, the northwest side is a verdant grassy hill that is connected to the Seongsan Village. The ridge provides an ideal spot for walks and for horse riding as well.

**[Natural History Museum]** displays mainly natural historical items such as marine life, soil and rocks, and fauna and flora of Jeju in a three-dimensional way. It gives visitors a better understanding of Jeju's unique nature and culture. It is divided into an Ecology Hall of Marine Life, a Soil and Rock Exhibition Hall, and a Land Ecosystem Hall.

Weather		Socket	Time Zone
